

Milind

Bachelors in Computer Science, IIIT Delhi, 2014 - 2018

Email: milindbumbu@gmail.com, **LinkedIn:** [linkedin.com/in/milind-dev](https://www.linkedin.com/in/milind-dev),

GitHub: github.com/DPirate, **Telegram:** [@QU4N74](https://t.me/QU4N74)

With over **7 years of experience**, primarily in **fast-paced startups**, I excel in writing clean, **maintainable code without sacrificing speed**. I'm driven by a **strong focus on user needs** and **enjoy collaborating across teams**. I'm very comfortable with **asynchronous communication** (having worked remotely for 5 years), dealing with ambiguity, and **quickly adapt to new challenges**.

SKILLS

Programming Languages: TS (9), JS (9), Python (7), HTML5 (8), CSS3 (8), Dart (6), Java (6), PHP (6), Rust(6)

Databases: MongoDB, PostgreSQL, DynamoDB, SQLite

Frameworks: React Native, Expo, Node.js, React, Flutter

Cloud Infra: AWS, IBM Cloud, Terraform, Docker, Serverless Application Framework, Github Actions, CDK

Misc: React Query, REST, GraphQL, MQTT, Retool, Redux

WORK EXPERIENCE

FULL-STACK ENGINEER | [VRYA.COM](https://vrya.com) | JUN 2024 - JAN 2026

Enterprise retail software for store and warehouse management

- Created LLM based workflows **improving overall team velocity by 20%**

Store Connect: React Native app for warehouse management

- **Lead Contributor**
- Built highly configurable app to support variety of B2B clients
- Re-implement DB queries improving response times by 70%
- Built **Node.js** server to communicate with warehouse devices and main server for app control and data handling at warehouse level

Sales Connect: Point of Sales app for **both mobile and desktop**

- Building **React Native app** with an **electron** wrapper to support desktops as well
- Bundled the app with local rust server which handles data processing using **FFI**
- Integrated hardware devices for PoS operations (scanner, display, printer)

FULL-STACK ENGINEER | [COSITO.AI](https://cosito.ai) | FEB 2024 - MAY 2024

Startup simplifying IoT ecosystem to make the world more accessible

- Built mobile app to onboard IoT devices with LLM powered chat
- **Led team of 3**, as the architect and provided mentorship
- Integrated fleet of IoT devices using **AWS IoT Core**

FULL-STACK ENGINEER | [YAYZY.COM](https://yayzy.com) | SEP 2020 - JAN 2024

Startup simplifying sustainable living by tracking and offsetting users' carbon footprints.

- **Lead frontend engineer** (React Native mobile app)
- Building technical roadmap, provide mentorship and collaborate with the design team.
- Develop **serverless backend and notification services** using **Node.js, Typescript, AWS Lambda/SNS/SES/Pinpoint**
- Implemented A/B testing, accelerating user validation of new designs.
- Redesign app from scratch, **improved UI response by up to 100%**.
- **Integrate Stripe** for payments and subscriptions
- **Integrate Open-Banking providers** to fetch and categorise user transactions
- Deploy B2B service **infrastructure** on **AWS** and **IBM Cloud**

FULL-STACK ENGINEER | [WENDOR.IN](https://wendor.in) | DEC 2018 - SEPT 2020

Building smart vending machines enabling data-driven decisions

- Developed **web dashboard** for analyzing machine and sales data
- Created a **React.js** based **vending machine user interfaces**
- Built service for communicating with vending machines, using **Python and MQTT**
- Built vending machine control module using RaspberryPi and **Node.js**
